

neuroanatomy through clinical cases pdf

Below are all the descriptions for the online courses. To order these courses go through the ASET store. Once you have purchased a course you will receive an email from Maureen Carroll with instructions for taking these online courses.

Online Education - ASET - The Neurodiagnostic Society

The trochlear nerve, also called the fourth cranial nerve or CN IV, is a motor nerve (a somatic efferent nerve) that innervates only a single muscle: the superior oblique muscle of the eye, which operates through the pulley-like trochlea.

Trochlear nerve - Wikipedia

The facial nerve is the seventh cranial nerve, or simply CN VII. It emerges from the pons of the brainstem, controls the muscles of facial expression, and functions in the conveyance of taste sensations from the anterior two-thirds of the tongue. The nerves typically travels from the pons through the facial canal in the temporal bone and exits ...
